

Connector between ZM/ZT

The product code M01153737, briefly described as ZM CONNECTOR between ZM/ZT 100x400, belongs to the category of cable duct components. The component is designed to allow the coupling between two different product series: ZM and ZT ensuring a safe and tidy cable installation. Manufactured in 1.50 mm thick sendzimir galvanised steel, the size allows the connection of a ZT 100x400 cable tray with a ZM 100x400 cable tray, complete with integrated connectors, and free of asperities, it represents an efficient and practical solution for those seeking a solution that combines quality, functionality and ease of installation.

M0 115 3737

Coatings

01 Galvanization (Sendzimir method) - UNI EN 10346

Technical Characteristics	
Dimension	
HxW (B)	100x400
Thickness	
[mm]	1,50
Technical Info	
No.of Inserts	4

Certifications

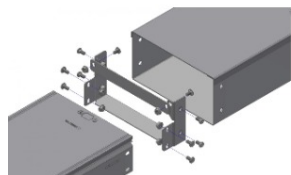

Not UL certified

Connector between ZM/ZT

Assembly

H.75

Bolts included: N°2 M6 + T0 620 0610/621

H.100
