Separator with bent top edge H: 50 - 75 - 100 - 125

Product code T00340010 is a separator designed with a safety profile and upper edging, which increases its rigidity and safety during installation, even with reduced thicknesses. Installation is carried out directly on site, at the installer's discretion, according to the requirements of the system. The standard length is 2920 mm, with a thickness of 0.8 mm and a height of 100 mm. The separator is made of Sendzimir galvanised steel, but is also available in stainless steel and with a hot-dip galvanised finish. Identified with the description STANDARD SEPARATOR H.100, it is certified according to the safety and quality standards required for installations, ensuring reliability and durability over time.

T0 034 0010

Length: 2920

Coatings

01	Galvanization (Sendzimir method) - UNI EN 10346
03	Hot dip galvanizing - UNI EN ISO 1461
40	Stainless steel AISI 304 - UNI EN 10088
