

30° flat elbow with Cover

The product with code T00890530, called 30° flat elbow with Cover 50X300, belongs to the category of components for cable ducts.

It is designed with a safety profile and self-locking snap-on cover to create 30° bends, ensuring optimal adaptation to flat routes. All flat components have an internal radius of 100 mm, identical to the external radius, increasing the usable space and allowing the ducts to be placed side by side. The product is made of Sendzimir galvanised steel with a thickness of 1.0 mm (body) and 0.8 mm (cover) and is also available in hot-dip galvanised, painted and stainless steel finishes. This solution combines quality, functionality and ease of installation, offering an efficient and practical option for cable management.
